

Gary S. Davidson
Team Leader – Strategic & Business Planning
NYISO

Gary Davidson is the Team Leader for the NYISO's Strategic and Business Planning group where he oversees the NYISO's strategic planning process, developing white papers and managing consultants to study emerging issues of critical importance to the NYISO's operations and markets. Prior to joining the NYISO, Gary worked for EDP Renewables developing utility-scale wind farms in New York and New England, where he was responsible for all aspects of project development, including site viability assessments, environmental permitting processes, land acquisition efforts, grid interconnection, and competitive landscape assessment. Gary previously worked as a policy advisor and Executive Assistant to the Chairman of the New York State Public Service Commission where he co-directed development of the State's Renewable Portfolio Standard as well as its energy efficiency programs funded through the System Benefits Charge. Gary began his career with the New York State Energy Research and Development Authority where he was responsible for media relations and communications activities.
