

Robert Rose

VP, Specialty Services,
A-Z Corp

Rob's 28 years of relevant industry experience provides our clients with a technical resource to manage some of the most demanding and complex projects in the industry today. His diverse background includes design experience, large and small scale plant operations, and facility maintenance. His unique combination of theoretical and practical experience provides a strong foundation for technical problem solving. In an industry where innovation and change are constant, Rob has guided the direction of the Electrical and Instrumentation Teams for over 10 years at A/Z by focusing on meeting our client needs. His expertise in electrical utilities, high voltage, power distribution, instrumentation, controls, shipboard electrical systems, and maintenance offers our clients the benefit of a strong reliable resource. Rob is a licensed Professional Engineer and Master Electrician in Rhode Island, Massachusetts, and Connecticut. Rob also holds a BE in Electrical Engineering from SUNY Maritime. He is active in the Institute of Electrical and Electronics Engineers (IEEE) and the International Society of Automation (ISA).
